

Quality products are our highest priority...

A former retail propane dealer, we know the importance of quality products and on-time delivery. That's why we go the extra mile to produce a superior product and strive constantly to meet or exceed your delivery expectations.

Quite simply, when you order a truckload of Quality Steel tanks, we'll advise you of the shipping date. And if we miss that date by more than five business days, you get \$1,000 cash back!* Furthermore, every tank in the load is backed by the industry's only 5-year written warranty.

If you need tanks...not trouble, call Quality Steel and put our commitment to superior products and on-time delivery to work for you. With a guarantee like this, there's never been a better reason to order from Quality Steel, so contact your representative today!

*Limitations may apply

Our new automated Q-Koting™ line ensures a better, longer-lasting finish.

We build our tanks to be safe, but it's also important that we make them attractive. In many cases, appearance can make the difference between setting a tank and a missed opportunity. That's why Quality Steel goes the extra mile to ensure a scratch-free finish on every tank.

This attention to detail begins with our new automated paint line, which produces one of the industry's best finishes. And our patented mildew inhibitors, anti-corrosives, and UV protection help keep your tanks looking better longer.

But it doesn't matter how good our tanks look when they leave us if they don't arrive on your site in the same condition. We don't rely on other shippers to deliver your tanks - we use our own air-ride trailers and patented truck cradling system to protect the tank finish as much as possible. Each of our 32 trailers has a special storage cabinet in which tank domes are packed separately to prevent paint chipping. With these delivery safeguards, Quality Steel has set the industry standard for exterior surface protection.

Q-Kote™ Tank Colors

Aluminum

White

Beige

Prime
